About

Business Intelligence Team Lead at Goodhill Enterprise (Cambodia), promoted within three months to direct data architecture, enterprise reporting, and a team building our Corporate BI Platform (Python + React). My path — Mitsubishi Motors data analytics, actuarial pricing at AIA, then BI leadership in FMCG — lets me carry a business question end-to-end: from raw data pipeline, to predictive model, to executive dashboard (e.g., automated demand forecasting covering 400+ SKUs at ~90% accuracy).

Experience

Goodhill Enterprise (Cambodia) Ltd.

Full-time • Jan 2026 - Present • 7 mos

● Business Intelligence Team Lead ▲ Promoted

Apr 2026 - Present • 4 mos

- **Leadership & Architecture:** Manage and mentor Data Analyst and ML interns while architecting a secure, scalable Corporate BI Platform (Python backend, React frontend) directing the team toward a unified single source of truth.
- **Dashboards & Automation:** Delivered a Modern Trade NPD Performance Dashboard monitoring speed-to-market, distribution expansion, and weekly velocity; automated ETL workflows with Python for the forecasting pipeline.

● Senior Specialist, Business Analyst

Jan 2026 - Mar 2026 • 3 mos • Phnom Penh, Cambodia • On-site

- **Enterprise BI:** Built data pipelines integrating sales, inventory, and finance into a unified BI platform; deployed complex DAX for sales pacing and multi-tier incentive payouts with capping logic across GT and PEP channels; created matrix-hierarchy visuals aligning execution with revenue objectives.

Actuarial Support – Group Product Pricing Analysis

AIA Cambodia • Full-time

Jan 2025 - Dec 2025 • 1 yr • Phnom Penh, Cambodia • On-site

- **Pricing, Valuation & Reporting:** Conducted actuarial analyses for product pricing and valuation; prepared monthly, quarterly, and YTD reports monitoring claim trends, persistency, and loss ratios for management and regional teams, partnering with Claims, POS, and Finance on data quality.
- **Automation & BI:** Automated reporting workflows (Excel, SQL, Power BI, Python) and developed a real-time Loss Ratio Dashboard enabling faster, more informed decisions.
- **Project — Insurance Claim Prediction:** Built a two-stage ML pipeline (classification + regression) predicting claim occurrence and severity, supporting proactive risk assessment and pricing accuracy.

Data Analyst Intern

Mitsubishi Motors Cambodia • Internship

Jul 2024 - Sep 2024 • 3 mos • Cambodia • On-site

- **Analytics & Reporting:** Collected, cleaned, and validated multi-department datasets; maintained Power BI dashboards for after-sales KPIs and monthly Repair Order-vs-target reports with year-over-year analysis.
- **Internship Project — After-Sale Service Performance Analysis:** Built an end-to-end Power BI solution over 11,000+ service records — data preparation, modeling, KPI dashboards, and service-demand forecasting — guiding management decisions on service efficiency and revenue recovery.
